

Nusa Counter Stool In Teak & Synthetic Rattan

The Nusa Counter Stool brings a relaxed, coastal sensibility to the kitchen or patio.

A solid high-grade teak frame is paired with a woven synthetic rattan seat and back, designed to echo the look of natural fibers while offering enhanced durability for both indoor and outdoor use. Subtle curves and rounded edges soften the silhouette, while a built-in footrest adds everyday comfort and support. Finished with a grain-enhancing neutral treatment, the teak is designed to wear in beautifully over time, developing character while maintaining its strength.

Designed in collaboration with Pure Salt.
