

Bali Backless Counter Stool In Natural

The backless edition of our Bali Counter Stool is designed for kitchens that call for a low-profile presence, while still bringing warm minimalism to everyday dining and gathering.

It's equally suited for adding extra seating at the end of an island, without overcrowding the space. Inspired by traditional Balinese craftsmanship, handwoven natural leather wraps a solid white oak frame, adding texture, depth, and comfort to its restrained architectural lines. The full-grain leather is vegetable-tanned to highlight the natural character of the hide, and finished with a protective coating to help wipe clean and guard against wear over time.
