

Hollis Dining Table In Reclaimed Teak

The Hollis Dining Table features organic contours with rounded corners and wide, curved legs, creating a silhouette that feels both grounded and fluid.

A slatted top allows rainwater to pass through, keeping it functional in any weather. Bold yet refined, it's built to last and stay beautiful through every season. Made from solid reclaimed teak, each piece is sourced from old-growth wood salvaged from traditional Indonesian homes—beams that carry a sense of history, now reimagined in a new form. Finished in a rich brown tone, Hollis pairs seamlessly with the Vera Dining Chair.
